Press Release

CrimeVision 2.0 Video Forensics Application Released by Imagine Products

New Integrated Video and Image Filters Simplify Analyses

CARMEL, IN, July 9, 2007: Imagine Products, Inc. announced today the release and general availability of version 2.0 of its popular CrimeVision™ application. The video forensics software is specifically designed for analysis and enhancement of surveillance footage.

New for CrimeVision™ v2.0 are integrated image and video filters, direct frame grab printing, an upgraded comparative measurement tool, variable video playback speeds and overall improved workflow.

The software's intuitive, straightforward interface makes working with video a reality for any law enforcement or loss prevention officer. Sharpen the video and individual images from one or many surveillance cameras in minutes with this powerful, court approved tool.

Features include: De-Multiplex, De-Quad, Frame Averaging, Frame Grabbing, De-Interlacing, Comparative Sizing, Video Splitter, video line Shifting, Frame Printing, Image filters, and Video filters.

CrimeVision is available for purchase as software only application for \$3999, or as a turnkey bundle of pre-installed software, accessories and computer. CrimeVision requires Windows XP or Vista operating system.

Imagine Products, Inc. develops high value, video analysis, archiving systems and asset management software for video professionals. Imagine Products corporate headquarters is located at 1052 Summit Dr., Carmel, Indiana 46032, USA. The company can be reached by phone at (317)-843-0706, by fax at (317)-843-0807, or on the web at www.CrimeVision.net.
